At Scobie McIntosh, we never fall out of our depth in undertaking challenging projects. That's why we were awarded the contract to manage the design, development and installation of catering facilities aboard an offshore oil facility in the North Sea.

CASE STUDY: OFFSHORE OIL RIG, NORTH SEA

PROJECT OVERVIEW

Scobie & McIntosh were awarded the contract to design, develop and install the catering facilities on board an offshore oil facility situated in the North Sea.

Scobie's management approach and the breadth of its service capabilities were critical factors in the client awarding us the contract.

The Scobie team are fully conversant with the specialised requirements relating to working within an offshore environment. Accustomed as we were to operate in a logistically challenging environment with demanding security and safety requirements.

BUSINESS CHALLENGE

The Scobie team overcame significant challenges including adopting extensive health and safety standards and utilising the limited space available. Since the Piper Alpha incident, there are particular challenges to offshore projects in that every aspect of supplying the required equipment is subject to extensive health and safety requirements.

Despite the logistical constraints of delivering this project on board an oil rig, the project team was able to draw on experience from earlier projects to successfully deliver the project.

Scobie & McIntosh also encountered other challenges. Electricity supplies can vary depending on which sector of the North Sea the rig is positioned, and the nationality of the company that operate the rig. We had to ensure that this was taken into account when designing and installing.

To further complicate matters, our team had to take into consideration the expected yaw and pitch of a rig when it is being moved or operated which can be quite considerable.

SCOBIE & MCINTOSH DESIGNED,
CREATED AND MANAGED A TEAM OF
HIGHLY SKILLED ENGINEERS WHO
EQUIPPED THE OIL PLATFORM WITH
HIGH QUALITY GALLEYS. THE TEAM
WERE RESPONSIBLE FOR SUCCESSFULLY
INSTALLING HIGH QUALITY EQUIPMENT
WHILE UNDERGOING SOME OF THE
MOST RIGOROUS HEALTH AND SAFETY
CHECKS

DELIVERABLE

- Design management
- Project management
- Stainless steel manufacturing
- Installation of galley and catering equipment
- Production of detailed O&M manuals with recommended spare parts packs
- Compliance with advanced health and safety, and environmental policies

SOLUTIONS

DESIGN AND PROJECT MANAGEMENT

- Full project management delivering seamless transition from design to installation
- Safety was the utmost importance on site. Scobie worked carefully to ensure compliance with all the health and safety requirements

SUPPLY AND INSTALLATION

- Manufacture and installation of the bespoke galley
- Supply and installation of market leading equipment

THE RESULT

PROJECT DELIVERY

The project presented challenges to time and cost, but teamwork, dedication and the capabilities of the Scobie McIntosh team delivered this project on schedule and within target spend.
